

GRNSW MEDIA RELEASE

Feasibility assessment: Greyhound racing in the Queanbeyan region

24/08/2018

GRNSW will commission an independent assessment of the feasibility of the development of a new greyhound race track located in the Queanbeyan region.

The analysis should assume that any investment in a new track will be consistent with the GRNSW 2018-2021 Strategic Plan.

Specifically, consideration should be given to the potential for a new track to:

- be co-located with existing sporting and recreational facilities
- be constructed consistent with the findings of the ongoing UTS study into optimal track design in respect of animal welfare
- attract sufficient race meets, and the associated impact on surrounding tracks/clubs
- support a greyhound racing 'centre of excellence' with rehoming facilities
- achieve TAB status to facilitate wagering
- adopt new technologies to enhance the broadcast experience.

The report should be available to the Minister three months from commencement.
